El Sewedy for Plastic Industry

ELSEWEDY  
CABLES

# El Sewedy for Plastic Industry

Established in 1996, Elsewedy for Plastic Industry is a subsidiary company of Elsewedy cables and now one of the largest companies in the Middle East producing PVC compounds and masterbatch. Annual capacity currently stands at 60,000 tons of PVC compounds, expected to reach 120,000 ton by year 2010, and 5,000 tons of masterbatch expected to reach 10,000 tons by year 2010

The company reputation is based on the thorough knowledge, know-how of its staff and the latest technology and equipment specific to the field of compounding. All stages of the production process are fully automated, from the feeding of raw material, to processing and weighing of the final product.

The state of the art facilities in our modern laboratory also ensure maximum quality control and enforce strict measures which ensure that its operation is in compliance with worldwide standards of safety and environmental regulations.

Because of increasing demand and from the company future prospective to differentiate its products and target new market segments; the company is increasing now its capacity and will add new production lines to fulfill the increasing demand of new lines of products such as:

- Cable Semi-conducting compounds
- Cable halogen free compounds
- Cable cross linkable polyethylene, XLPE
- Cable high-density polyethylene black jacket, HDPE
- PVC compound -Medical Grade

These new lines will be located in our new production facility known as EGYPLAST.

SEDPLAST and EGYPLAST factories are located in the 10th of Ramadan City, and 60 km east of Cairo with expressways linking it to Egypt's major Mediterranean and Red Sea ports. The sales office is located in Cairo

Clients segments include cable manufacturers, packing companies, as well as exporting to many African and Asian countries such as Lebanon, Syria, Yemen Morocco, Algeria, Tunisia, Sudan, Ethiopia, Kenya, Tanzania and Nigeria

Our entire staff (operation, marketing, administration, sales, etc.) is wholly committed to satisfy the customer requirements and needs.

SEDPLAST product range

- PVC compound
- Masterbatch compound

# Masterbatch

Thanks to masterbatch it is possible to introduce pigments and additives dust free and without dosing problems during the processing and compounding of plastics

El Sewedy for Plastic (SEDPLAST & EGYPLAT) supply the plastic industry with Colors and Additives masterbatch on specific carriers (Polyolefin, Polystyrene, Polyvinyl chloride, ..) to match different processing techniques including injection, blow molding, extrusion, thermoforming,...

## Products

- White masterbatch
- Black masterbatch
- Color masterbatch
- Special effect masterbatch (metallic, pearlescent, fluorescent, Glitter)
- Additive masterbatch (UV, anti block, slip polymer processing aid, mold release, Antimicrobial)

El Sewedy for Plastic (SEDPLAST & EGYPLAT) has developed many other formulations tailored to suit customer requirements.

When you choose SEDPLAST you can expect your color - your way.

# PVC Compound

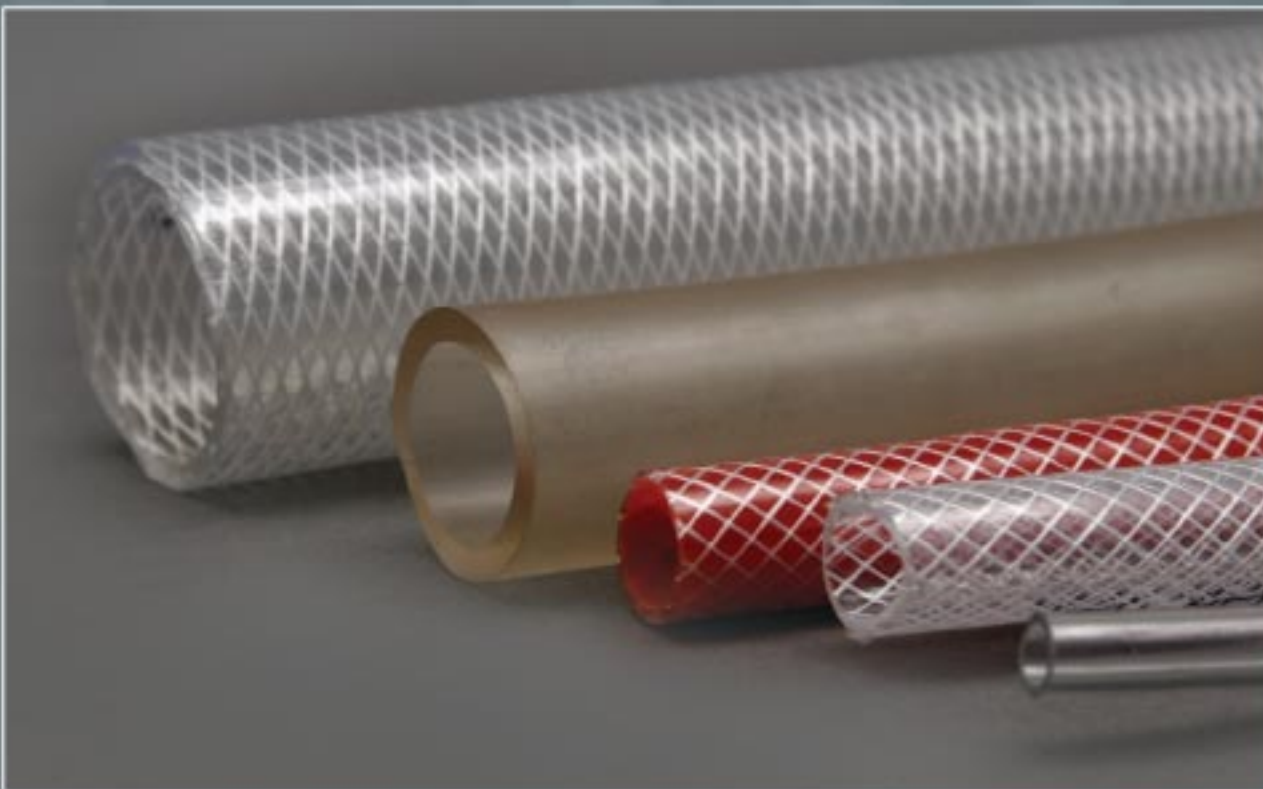

PVC compound is a unique thermoplastic material, which can be compounded to meet a wide range of diverse applications.

El Sewedy for Plastic (SEDPLAST & EGYPLAT), formulates and manufactures Soft and Rigid PVC compounds. PVC supplied in granulates or powder blend form

## Soft PVC

A comprehensive range of a standard grade is available and many grades are made as per the customer requirements including

- Wire and Cables (Insulation, sheathing ,filling)
- High clarity transparent compound for shoes, soles, hoses
- Profiles
- And More

## Rigid PVC

- Pipes (high pressure, low pressure, corrugated, electrical)
- Pipe Fitting
- Trunks and conduits
- Windows profile
- Bottles
- And more

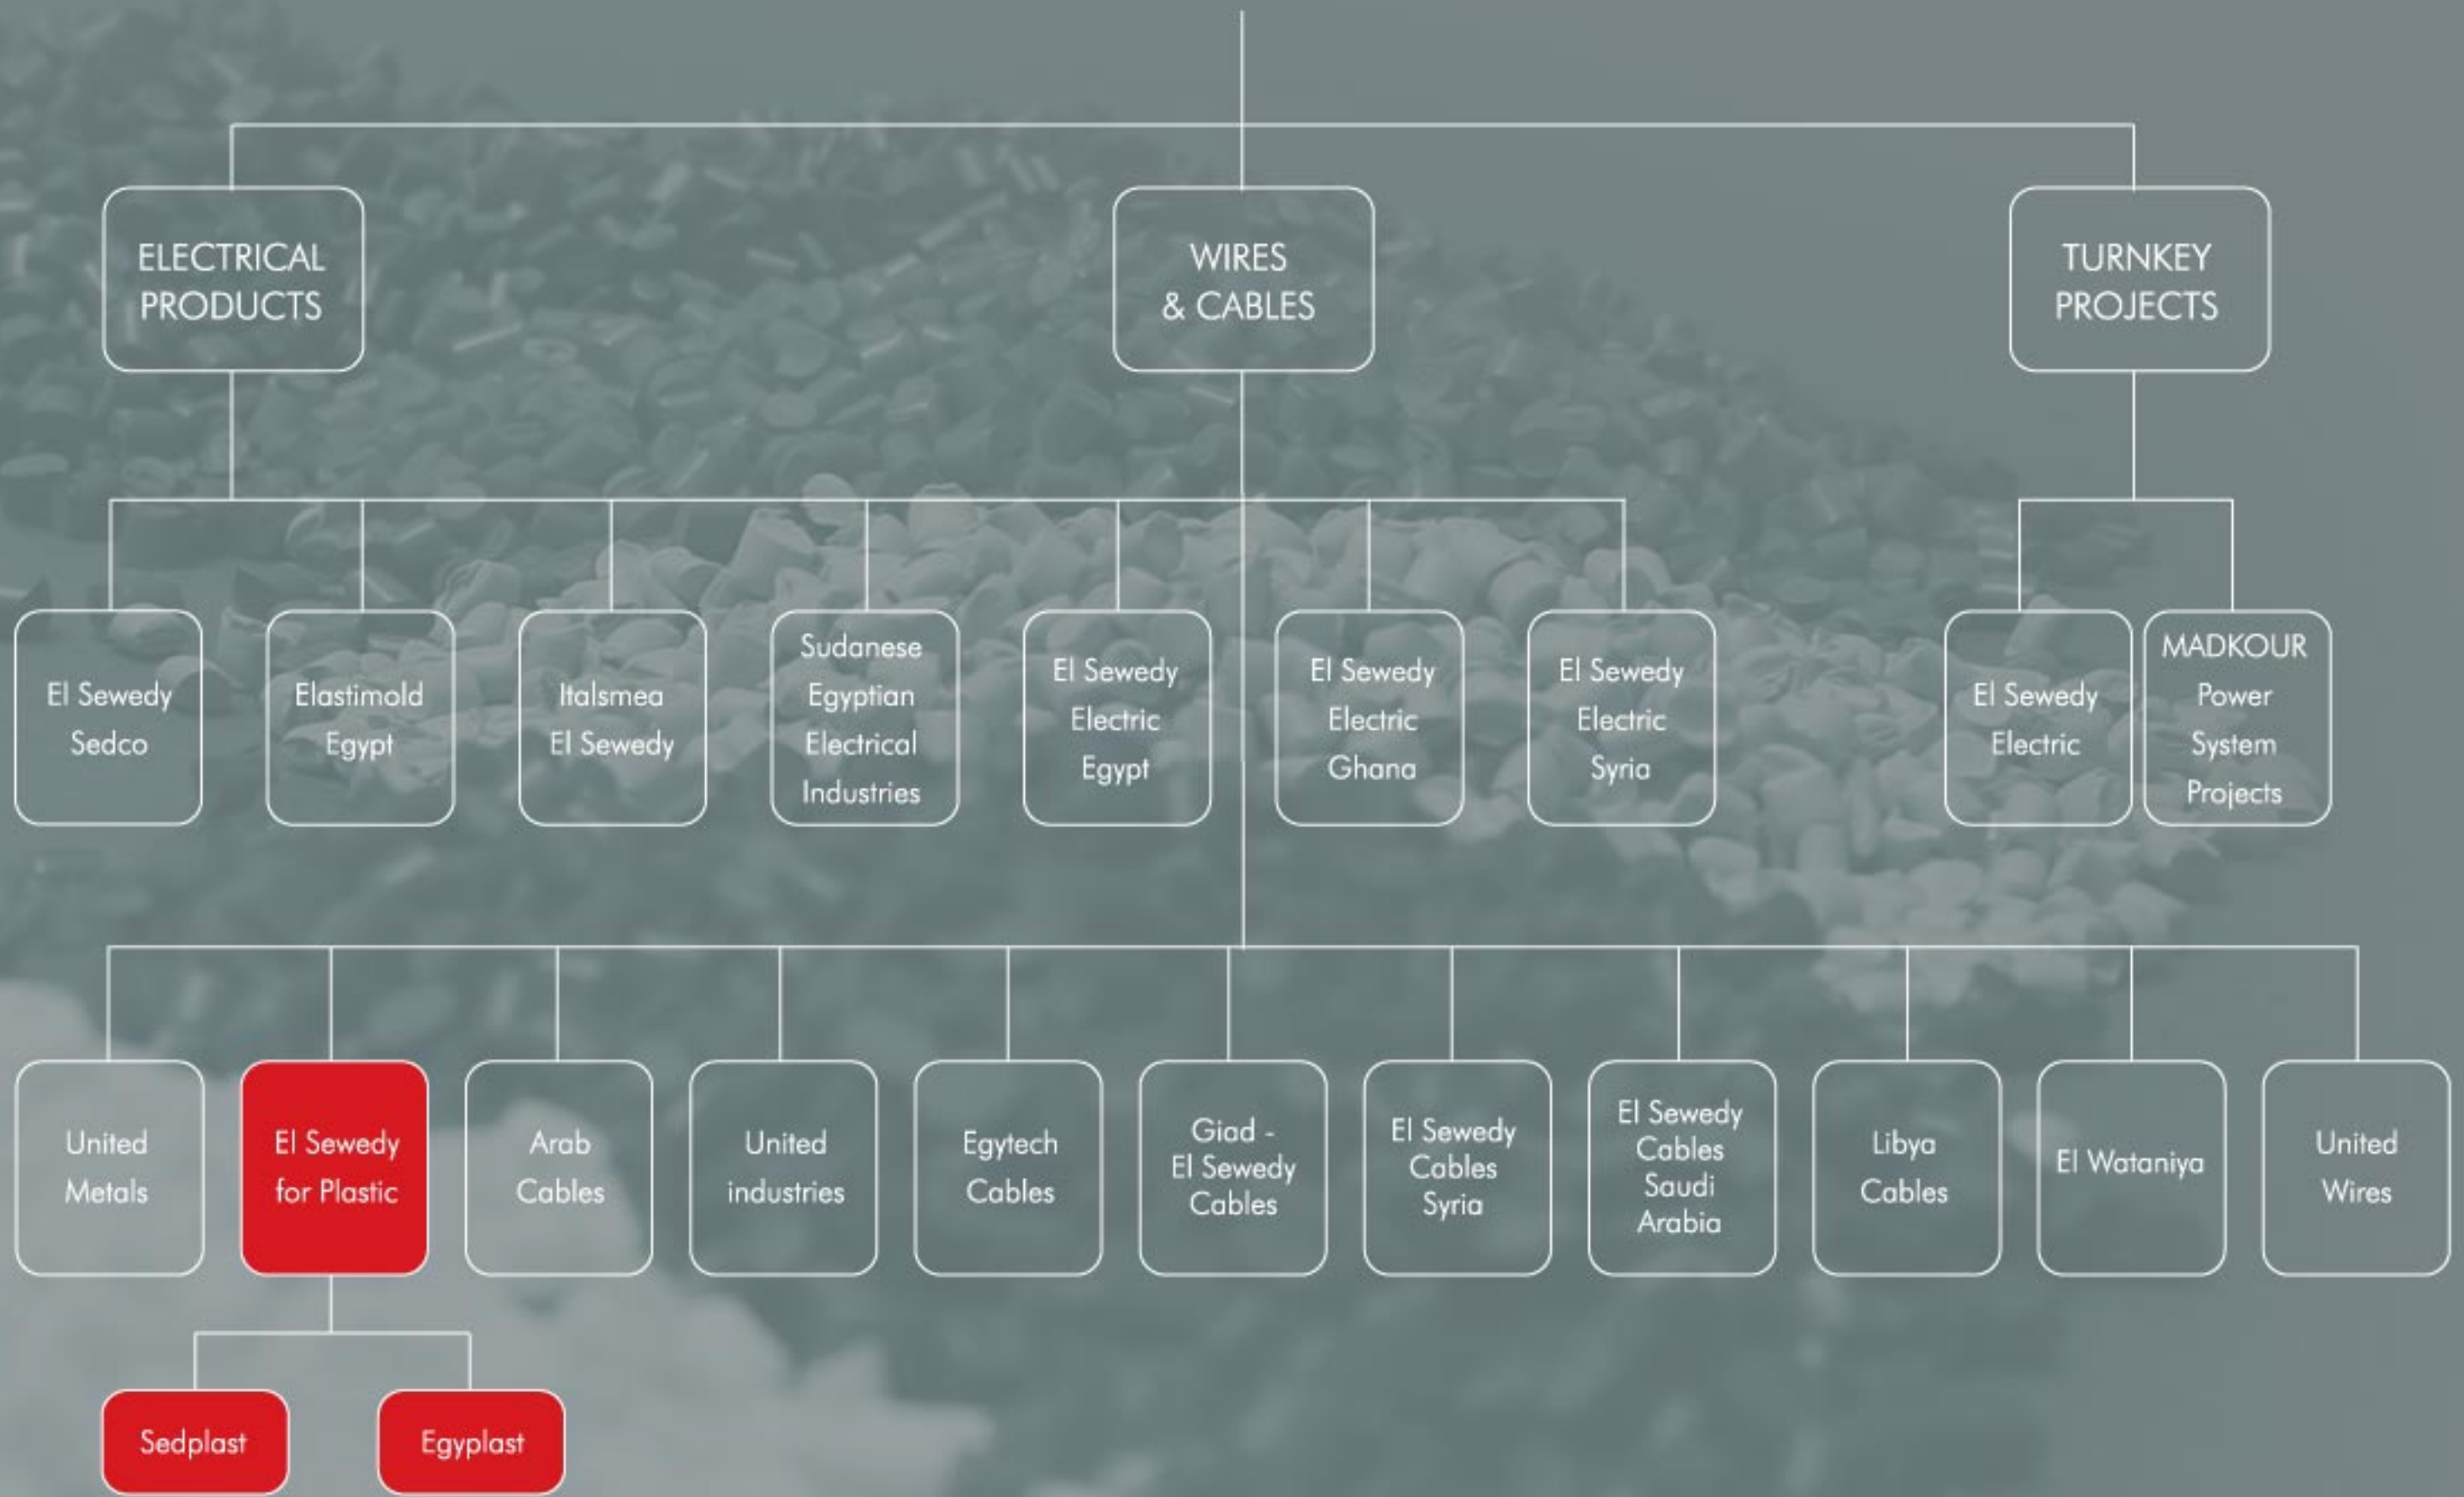

## Special Compounds

- Flame Retardant, Low Smoke, Oil Resistant, etc....
- And More
